

New Role: Technical Project Manager

High Wycombe, Buckinghamshire - UK

Salary range: £50,000.00 - £60,000.00

Reports to: Service Delivery Director

We are looking for an experienced Technical Project Manager to join our expanding team. The ideal candidate will come from a hands-on development background but will also have proven project management/man-management experience in a services delivery type organisation.

Areas of responsibility

Reporting to the Delivery Director, you must deliver cost effective and high-quality solutions to our clients. You will be involved in the entire life cycle of projects from documenting business requirements, creation of functional and/or technical specifications, coding, Quality control and testing and handover duties.

More specifically:

- Direct Work closely with the client and ensure effective communication at all times
- Documentation
- Task scheduling
- Resource allocation
- Mentoring & training of junior staff
- Make on-site visits to clients where necessary
- Estimating
- Maintenance and/or creation of relevant procedures and guidelines
- Code Reviews
- Quality Management
- Ensuring best practice is adhered to at all times

Experience required:

- At least 10 years direct experience of working within a JD Edwards EnterpriseOne development environment.
- A strong structured programming background is essential
- Good level of ANSI C programming and debugging experience
- Microsoft Visual Studio .NET 2012 or older versions
- Experience in managing development teams of 5+ people
- Experience in managing and delivering successful development projects
- Good working knowledge of main JD Edwards modules such as Financials, Distribution, Inventory, Transportation & Manufacturing

- Good understanding of principles of database design and good working knowledge of at least one of the following databases: SQL, DB2 or Oracle
- A strong technical development capability is essential
- Exposure to Web Services and protocols such as SOAP, WSDL etc preferable, but not essential
- Exposure to JDE Mobile Architecture, but not essential
- Exposure to JDE BI Publishing, but not essential
- Stakeholder management experience

Qualifications and skills

- Degree in numerate or IT discipline
- Excellent team player
- Excellent communication – both written and verbal
- Quality and standards oriented
- Ability to work to tight deadlines
- Ability to prioritise effectively
- Strong problem-solving ability
- A curious nature, i.e., desire to find out how things work
- Tenacious – will want to see a problem or issue through to its ultimate conclusion
